

# PAIN RELIEF NOW APPROVED FOR SHEEP

Ask your vet for details

# SHEEP FARMING SHOULDN'T BE A PAIN

---

The face of animal husbandry is changing, and it is now routine for effective pain relief to be used during painful livestock procedures in cattle, pigs and horses.

Now, sheep can benefit too.

Metacam®, the non-steroidal anti-inflammatory (NSAID), has been approved for use in sheep. A single dose via subcutaneous injection on the neck behind the ear provides effective alleviation of pain and inflammation for sheep and lambs over 14 days old.

Metacam® can now be used on any occasion where the animal will benefit from pain relief e.g. mulesing, castration, tail docking, lameness, surgical procedures, even injuries sustained during shearing.

Help manage the effects of painful animal husbandry procedures with Metacam®, and your sheep will reap the benefits.

# INTRODUCING A WORLD FIRST!

---

Metacam® 20mg/ml has been approved in Australia for use in the alleviation of pain and inflammation in sheep. This is a world first for Metacam® 20 for sheep.

## DOSING

For sheep and lambs from 14 days of age:  
1.0ml Metacam® per 20kg bodyweight.

## ADMINISTRATION

Single use only by subcutaneous injection high on the neck behind the ear.

## WITHHOLDING PERIODS

**MEAT:** Do not use on sheep less than 11 days before slaughter for human consumption.

**MILK:** Do not use in lactating ewes or pregnant ewes within 11 days of lambing where milk may be used or processed for human consumption.

**ESI:** Do not slaughter for export less than 11 days after final treatment.

Repeat treatments (more than once), higher doses or injection into the muscle could result in residues above the MRL's unless the label withholding period is extended. Consult with your veterinarian.

Metacam® is only available on prescription.
